

Assignment

YOUR TASK is to demonstrate that you are able to format a written page with footnotes and cite resources properly using the Chicago style.

Your topic is the “**dangers of marijuana on teens,**” and you must write a one or two paragraph argument on **whether or not Canada is doing the right thing making marijuana legal**. You are not required to do any research at all. The resources that you are expected to use have been given to you. Although you must write a paragraph or two, we are not terribly concerned with what you have to say or how well you write. Write anything you want...just make sure it's not nonsensical. We are marking your citations not your writing. Marks will be given for knowledge and application and NOT for thinking and communication.

## Requirements:

- 1- You must use footnotes
- 2- You must use all three resources at least once
- 3- You must include at least one “quick citation”
- 4- You must include at least one “ibid.” citation
- 5- You must have at least one longer quotation of five or more quoted lines that use “indented block” style (see guide page 5 under “some rules”)

Bibliography??
